Question No: 25 (Marks: 3)

Throw light on the Defense Industry of Pakistan

www.vuattach.ning.com

Pakistan Defense Industry the Ministry of Defense Production was created in September 1991 to promote and coordinate the patchwork of military production facilities that have developed since independence. The ministry also includes seven other specialized organizations devoted to research and development, production, and administration. The navy is supported mainly by a facility at the Karachi Shipyard, which has limited production capacity. In 1987 development of a submarine repair and rebuild facility at Port Qasim was begun. By early 2000, in a joint project with China led to the development of the JF-17 Thunder fighter and the Al-Khalid Tank. Pakistan also has taken major steps to becoming self sufficient in aircraft overhaul and modernization and tank and helicopter sales and in a transfer of technology with France led to the construction of the Agosta B-90 Submarine in the late 1990s and early 2000s and is currently actively participating in many joint production projects such as Al Khalid 2, advance trainer aircraft, combat aircraft, navy ships and submarines.
After the success of its major developments in the defense industry the Defense Export Promotion Organization (D.E.P.O.) was created to promote Pakistan defense equipment to the world by inviting major and small players to the I.D.E.A.S. Exhibition, which is held annually at the Karachi expo center. In recent reports, the defense exports were worth over $500 million USD in 2006 and growing annually.

Question No: 26 (Marks: 3)

Define agriculture and its role in any country's prosperity

There is an earlier **definition** by **a** FAO experts meeting (2005) that **...** mere generalisations on the unhealthy **role** of saturated fatty acids. **...** 66 % of the **agricultural** land (or 13 % of the **country's** area) is grown with oil palm. **...** An important contribution of palm oil is **its** ability to supply. Some research activities start from this **definition** to argue that the **....** is the reason the main focus of most programs is still on low-income **agriculture**. **...** (2008) **a** critique of the basis of sustainable development, with **its** binary **...** can hide **a** will to protectionism from the developed **country** to impede the **. facility.**

Question No: 27 (Marks: 3)

Briefly explain the issue of Junagarh state.

Question No: 29 (Marks: 5)

What do you know about the River/Cannal System in Pakistan?

Farming and agriculture are said to be the oldest activities being performed by human on this earth and with the passage of time there have been some innovations and some new techniques to perform this activity. If we talk about Pakistan it has one of the most fertile soil in this world and all the credit goes to the presence of Indus valley in this region. Irrigation is just like the blood of agriculture and farming, there was a time when such activities used to be performed near rivers but as the time passed the land near river was no more available but the requirement of water was still there. As I said earlier there have been innovations in this field as well, the idea of irrigation with the man made resources

www.vuatech.ning.com

emerged. Another reason for the emerging of this idea was to coup the problems in case of less rainfall.

The area where Pakistan is situated is blessed with some natural gifts and one of them is the irrigation system almost 75% of the land which is in agricultural use is covered by the irrigation system. Rivers have been the largest water source for many years, the rain fall has also been an important source and the third one is ground water.

Question No: 30 (Marks: 5)

Highlight the Reaction to Muhammad Ali Bogra Formula 1953?

Question No: 31 (Marks: 5)

Shortly explain the research infrastructure available in our educational institutions. What are the suggestions to improve it?

Note : - this paper is attempt by a student in spring 2010 and not solved by vuattach so please also verify this on your own…
